

ABOUT US

A Promise of Wellness

Sunshine began in 1967 as a small pharmacy in Gampola. Today, we are market leaders across multiple business segments, including research and development, manufacturing, importation, distribution, and retail. We now reach over 3,500 pharmacies and command a 12% share of the growing pharmaceutical market. We create world-class systems tailored to local needs.

Our Products & Services

Sunshine Healthcare is Sri Lanka's only fully integrated pharmaceutical company, with operations spanning manufacturing, importing, marketing, distribution, and retail. We've built trusted, long-term relationships with leading global partners, and as a result, we've become the second-largest private healthcare distribution company in the country, representing over 30 international companies.

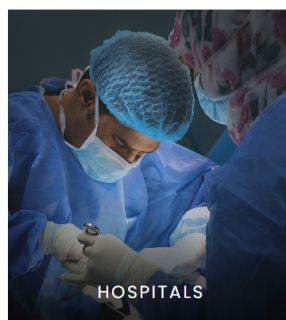

Our diverse product portfolio covers both prescription and over-the-counter drugs, serving all customer channels, including retail pharmacies, modern trade, hospitals, and government tenders (SPC, Osu Sala, etc.). We represent over 50 of the nation's No. 1 or No. 2 prescribed brands and hold a 12% share of the private market (IQVIA). We are market leaders in dermatological, diabetic, and cardiovascular medicine, with strong positions in gastrointestinal and pain management drugs.
